AIR MINISTRY.

Form 1090

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

✓ *Kept at* New Barn, Abbotsbury

in the County of Dorset

by James White

Lat. .... Long. ....

Time of Observation 8. AM

Nearest Railway Station Abbotsbury

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 6 in.

" " " " Sea Level 111 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**
(*formerly B.R.O. Form A.1*).

REGISTER OF RAINFALL IN 1921

6 JAN 192

Kept at Barrow Hill, Bere Regis
in the County of Dorset
by C Lucas

Lat. Long.
Time of Observation 9 am
Nearest Railway Station Wool
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Burrows Hill. Bere Regis. Wareham
in the County of Dorset.
by A. E. Lucas

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Wool.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. – in.
" " " " Sea Level – ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1925.

Kept at (Field's Oak) Blandford
in the County of Dorset
by H. S. Woodhouse

Lat. Long.
Time of Observation 9 am.
Nearest Railway Station Blandford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0¾ in.
" " " " Sea Level ? ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

For 9 o'clock 12 June

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Field's Oak, Blandford 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that an omission has occurred on 22nd September as shown below. Bryanston ·74 in Field's Oak — Iwerne Minster (Preston House) ·74 in Iwerne Minster Gardens ·85 in It is recommended that the value ·75 in be adopted. If you concur in this amendment, the total for the month of September will be 4·07 and that for the year 40·15 inches. We shall be glad of your comments on this point. H. C. Carter 14.6.26.	I agree & regret the omission H. S. Woodhouse

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return........................
3. „ „ „ „ Weekly (Form 3110)........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

JAN 1922

FORM A. 1. METEOROLOGICAL OFFICE.—~~BRITISH RAINFALL ORGANIZATION.~~

REGISTER OF RAINFALL IN 1921.

Kept at Bradford Peverell

in the County of Dorset

by Charlotte L. Middleton

Lat. Long.

Time of Observation 10. a.m.

Nearest Railway Station Grimston

Diameter of Funnel of Rain Gauge 6 in.

Height of top of Gauge above Ground 1 ft. 1½ in.

" " " " Sea Level 381 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Bourne Valley Gasworks 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the amount entered to 1st January is unduly low, as shown below Firgrove, Parkstone ·95 in. Bourne Valley Gas Works ·18 " Alderney Waterworks ·85 " It is suggested that the value 1·18 in be adopted, making the total for the month 5·63 in. We shall be glad to know if you concur in this. The sum of the monthly totals is not in agreement with the annual total, the correct figures, allowing for above amendment, being 38.56 inches. We should be glad of your comments on these points. H. E. Carter 12.6.26.	In reply to your letter I agree that the Rainfall to Jany 1st was probably 1.18" instead of 0.18". I also agree that the total rainfall including the above correction should be 38.56 and I regret that you should have been troubled in the matter P. G. S. Moore O. MD

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return........................
3. " " " " Weekly (Form 3110)........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

REGISTER OF RAINFALL IN 1921.

11 JAN 192

Kept at Alderney Waterworks
in the County of Dorset
by P G G Moon

Lat. Long.
Time of Observation 8 A M
Nearest Railway Station Branksome
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 3 in.
" " " " Sea Level 213 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM 1090.

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Alderney Waterworks
in the County of Dorset.
by Bournemouth Gas & Water Co

Lat. Long.
Time of Observation 8 AM
Nearest Railway Station Branksome
Diameter of Funnel of Rain Gauge 8" in.
Height of top of Gauge above Ground 1 ft. 3 in.
" " " " Sea Level 213 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

(*formerly B.R.O. Form A.1*).

REGISTER OF RAINFALL IN 1921

Kept at "Coneygar", Bridport

in the County of Dorset

by Hy Gordon

Lat. ---

Long. ---

Time of Observation 10 a.m.

Nearest Railway Station Bridport

Diameter of Funnel of Rain Gauge 4 in.

Height of top of Gauge above Ground 1 ft. - in.

" " " " Sea Level 110 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

7th Jan. 1922

10 JAN 1922

Dear Sir,

I am very sorry that the record for September is mislaid & cannot be found.

I have however found out from a person who keeps a very careful record of the weather that a very small quantity of rain did fall on the

11th. 16th. & 17th. of that month.

I thought it better to leave the Registers incomplete & merely state what I know to be facts.

Yrs. faithfully

M. Therese Schuster

QUERY FORM.

On examination of the return of observations made at

Blackdown House 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that the entry on May 18th is unduly large Beaminster . . . . ·64 in Blackdown House . 1·23 " Chedington . . . ·26 " Cricket St. Thomas . ·57 " Have you any notes which would confirm so high a value? as the record would appear to be at least half an inch higher than other records in the neighbourhood H. L. Carter 12.6.26.	In reply to yours of the 12th inst., the fall in question is quite correct as taken from my figures. It certainly seems high compared with others, but this is sometimes the case, & I ascribe it to being under the slopes of Pilsden Hill, the highest in Dorset, which probably catches the clouds & causes a heavier fall than elsewhere C. L. M. Pinney 14.6.26. P.S. I have no notes on the subject. Accept 1·23 inch. H. L. C.

N.B.—This paper should be folded so as to bring the printed address outside and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Spring Cottage, Cann 1925.

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations shows that on 4th January and 23rd February your entries are not in good agreement with the places set out below.

	Shaftesbury.	Cann	Fontmell Magna.
Jan. 2.	4·6	2.5	(7·6)
" 3	3·2	2.5	4.8
" 4	–	2.5	–
Feb. 23	1·2	11. 3	2·0

It is suggested that the entry on Jan 4th is a repetition of the value entered to the 3rd, and that 1·3 mm be adopted for February 23rd. If you concur in these amendments the total for January will become 89. 5 mm. and February 117. 0 mm. The total for September is not in agreement with the sum of the daily values (79·7), and the year's total is 868·6 mm. if you agree to the suggested amendments. We shall be glad of your comments on these points.

H. L. Carter
18.6.26

REPLY.

It may be that 2.5 is a number repeated but it is impossible for me to give any opinion after all these days

That again is probable, but I cannot say now

I accept your totals

I again accept your totals

A. Macdonell
21. 6. 26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

Adopt suggested values.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return........................
3. " " " " Weekly (Form 3110)........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1921.

Kept at ~~Bucknowle House~~ Corfe Castle,
in the County of Dorset
by C. Waterston

Lat. 50° 38" N Long. 2° 43" W
Time of Observation 9 a.m.
Nearest Railway Station Corfe Castle
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 170 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Kingston Vicarage

in the County of Dorset

by Revd. R. A. Bond

Lat. 50° 37′ Long. 2° 3½

Time of Observation 9 am

Nearest Railway Station Corfe Castle

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 8 in.

" " " " Sea Level 452 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Corfe Mullen Nr Wimborne

in the County of Dorset

by Poole Corporation Waterworks

Lat. ______ Long. ______

Time of Observation 9 am.

Nearest Railway Station Wimborne

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. — in.

" " " " Sea Level 81 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Forest Hill, Corfe Mullen 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925, shows that on May 7th, 22nd and 23rd, the entries are not in good agreement with neighbouring stations as shown below.

	May 7.	May 22-23
Corfe Mullen Water Works	·64	·17
do Forest Hill	·21	–
Sturminster Marshall	·50	·16
Broadstone	·52	·10

It is suggested that values of ·51 and ·15 inches be adopted, making the total for May 4·19 in we shall be glad to know if you concur in this. The total for December is not in agreement with the sum of the daily values. The [illegible] correct amount is 4·01 inches. Allowing for these amendments the total for the year becomes 40·39 inches. We should be glad of your comments on these points.

H. S. Carter
14.6.26.

REPLY.

In the absence of any note of thunderstorms in this area on the 7th, I suppose I must accept the suggested correction, but a rainfall of over .50 is so remarkable that the possibility of error is less than usual. Unfortunately I have to depend on my gardener for the observation, which I check from time to time as opportunity offers.

May 22 & 23. I think an average might be interpolated here. It is curious that May should shew variations unless due to thunderstorms.

December. The correct amount is as you state - 4.01

If you have thunderstorms reported from this area on May 7th, I should myself prefer to let my return stand.

I regret the trouble given.

E. Philip Belben

Adopt suggested corrections.

16.6.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..................
2. Necessary corrections made in Monthly Return..................
3. „ „ „ „ Weekly (Form 3110)..................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM A. 1. METEOROL GANIZATION.

REGISTER OF RAINFALL IN 1921.

1 JAN 1922

Kept at Wollaston House Dorchester
in the County of Dorset
by Capt J. E. Acland

Lat. 50· 43 N Long 2 26' W.
Time of Observation 9 AM
Nearest Railway Station Dorchester
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 200 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. **Full** instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Form A. 1. **METEOROLOC NIZATION.**

REGISTER OF RAINFALL IN 1921

25 JAN 1922

Kept at Kingscote, Dorchester
in the County of Dorset
by E. Archdall Ffooks

Lat. 50.42 Long. 2.27
Time of Observation 9 A.M. approx.
Nearest Railway Station L.S.W. or G.W. Dorchester
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 226. 4 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to ~~The~~ Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Stinsford

in the County of Dorset

by J. Wyndham Hull

Lat. 50.48 Long. 2.24

Time of Observation 9 A.M

Nearest Railway Station Dorchester

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 204 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

AIR MINISTRY.

FORM 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

Register of Rainfall in 1926.

Kept at (Stinsford) Dorchester

in the County of Dorset

Diameter of Funnel of Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" Ground " Sea Level 207 ft.

Observers are requested to read the instructions printed overleaf before filling in this form.

Every Observer should fill in section C overleaf.

THE MORNING MEASUREMENT IS CREDITED TO THE PREVIOUS DAY.

An observer who does not conform to this rule should insert the reading made on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

Rainfall 1921 Dorchester

Please see corrections for wrong day & confusion figures for Jany & July.

John Glasspoole
18.4.22.

Mr Whipple.

Jan. total came up as 110·6 altered in MO3 to 120·6. Jan 26th was given to us as 2·8. accept.

The suggested amendments with regard to dates appear to be well supported.

July total came up as 15·2 altered in MO3 to 16·2

C E Brooks

FORM A.
BRITISH RAINFALL.

REGISTER OF RAINFALL IN 1925

Kept at Melbury House Garden

in the County of Dorset

by R Rintoul

Lat. .... Long. ....

Time of Observation ....

Nearest Railway Station ....

Diameter of Funnel of Rain Gauge .... in.

Height of top of Gauge above Ground .... ft. .... in.

" " " " Sea Level .... ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

10 FEB 1925

Kept at Fontwell Magna, Shaftesbury
in the County of Dorset
by James Appleyard

Lat. 50.57 N Long. 2.12 W.
Time of Observation 9 a.m.
Nearest Railway Station Shillingstone
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 8 in.
" " " " Sea Level about 700 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Forde Abbey 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
Certain entries on your rainfall return for 1925 are not in good agreement with neighbouring stations.	I shall be very pleased to adopt the figures you suggest, and am very sorry that these discrepencies occured last year, but I did explain this before sending up the figures. Geoffrey D. Roper.

	Blackdown House	Forde Abbey	Cricket St. Thomas	adopt.
March 25.	·09	–	·09	·10 in
May 5.	·30	–	·45	·40 "
" 17–18	(·79)	–	·65	·75 "
July 25.	·15	–	·18	·15 "
Sept. 19.	1·54	·51	1·66	1·51 "
Dec. 15–27.	2·81	·08	2·63	2·58 "

It is recommended that the values set out in the last column be adopted. If you concur in these amendments the totals would become March ·29 in May 4·98, July 2·57, September, 4·57 in Dec. 5·67 in, and the year 41·76 inches We shall be glad to hear from you on these points.

A copy of "Rules for Rainfall Observers" is enclosed.

H. G. Carter
12.6.26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........
2. Necessary corrections made in Monthly Return..........
3. " " " " Weekly (Form 3110)..........

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........

FORM 1090

1558

26 JAN 1924

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Gussage Manor

in the County of Dorset.

by Mr. Good.

Lat. .... Long. ....

Time of Observation 9 a.m.

Nearest Railway Station Verwood.

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 4 in.

" " " " Sea Level 200. ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

H. G. Carter Esq.

Dear Sir I regret I have not been able to reply before, but have been away from home. I find I unfortunately did make a mistake in the entry of rainfall on Jan 2nd 1925. The total for Jan should have been 4·97. (Jan 2nd being ·34 - not ·24) which makes the total for the year 38·08. inches.

Yours faithfully
Eve. M. Good.

....

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied :—

(a) Is it known that the gauge was empty at the beginning of the measured rainfall ?
(b) What note was made of the times of beginning and end of this fall ?
(c) When was the measurement made ?

Signature...

M.O. 7
13 JAN 1926

D INSTRUCTIONS.

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C. 2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type* :—

(a) *Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st ; it is therefore the amount measured on January 2nd.*

(b) *The raingauge should be visited every morning without exception.* When there has been no precipitation the entry in the register should be a dash — (not ·00). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than ·005 in. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

(B) The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

(c) *On some measures there is graduation marked ·005 ; this graduation is to show the limit between the amounts which count as ·01 and those which are mere "traces."* An entry ·005 is not to be made in the register.

(d) If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus $\left.\begin{array}{r}17\\18\end{array}\right\}\cdot 14$ would show that the reading on the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was ·14 in.

(e) *The total rainfall for the month is found by addition. The addition should always be done a second time as a check.* The check is of special importance when the total has already been found in another copy of the register.

(f) *The "total number of days with ·01 in. or more" includes all the days with any rain except those for which the entry is "trace."*

(g) If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

(h) The heaviest daily fall for each month should be underlined.

" " " " Sea Level 64 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Holwell 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return for 1925 with neighbouring stations suggests that omissions have occurred on 12th August and 25th September, as shown below.

	Aug. 12.	Sept. 25
Leigh	·30	·27
Glanville Wootton.	·15	·21
Holwell	–	–
Sherborne Castle.	·19	·28

It is recommended that values of ·20 and ·25 in. be adopted for these dates. If you concur in these amendments the totals for August and September will become 2·99 in and 3·42 in respectively, and that for the year 36·63 inches.

We shall be glad of your comments on these points.

H. E. Carter
14.6.26

REPLY.

My entries are quite correct. I remember that on several occasions last summer there was heavy rainfall quite close to us, whilst we escaped.

H. Warry.

Accept with query.
R.C.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

South Kensington, London, S.W. 7.

QUERY FORM.

On examination of the return of observations made at
Preston House, Iwerne Minster 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return for 1925 with neighbouring stations suggests that an omission has occurred on January 29th, as shown below. Iwerne Minster Gardens ·31 in. Preston House ~ Fontwell Magna ·19 in. Iwerne Courtney ·16 " It is recommended that a value of ·20 in. be adopted. If you concur in this the total for January will be 4·65 in. The total for July is not in agreement with the sum of the daily values the correct amount being 2·33 in. Allowing for these amendments the total for the year is 38·91 inches we shall be glad of your comments on these points. H. E. Carter 14.6.26	Ref. your query, I will adopt the value of ·20 in. rainfall on 29·1·25 tho' I am at a loss to understand how I came to omit registering the fall. I was at home & am most careful over my rain gauge. The total for July should read 2·51, so I imagine I have sent for the wrong (totals) daily. They should read as follows:– July 2nd ·09 July 28th 1·78 ·03 " 3rd ·07 " 29th ·07 " 6th ·33 " 30th ·54 " 9th ·03 " 31st ·09 " 17th ·03 Total 2·51 inches " 20th ·04. " 21st ·42 Total for 1925 " 22nd ·20 will now read " 25th ·13 39·09 inches ✓ " 26th ·31 Please inform me if you agree this " 27th ·13 1·78 H. W. Aston Answered [illegible] 15/6/26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........
2. Necessary corrections made in Monthly Return..........
3. " " " " Weekly (Form 3110)..........

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........

(192) Wt. 4402A—10416 2,000 6/24 T.S. 128

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Iwerne Courtney Rectory

in the County of Dorset

by Rev: R. Hugh Gundry.

Lat 50.54.39 N Long. 2.12 W.
Time of Observation 9 A.M.
Nearest Railway Station Shillingstone
Diameter of Funnel of Rain Gauge 4 7/8 in.
Height of top of Gauge above Ground 1 ft. 2½ in.
" " " " Sea Level 200 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

8 JAN 192

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Kinson

in the County of Dorset

by A. Chas. Kevil

Lat. ? Long.

Time of Observation 9. a. m

Nearest Railway Station Wimborne

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground ft. 6 in.

" " " " Sea Level 45 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following. ·30

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.
